DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Watanabe (US 6,539,240).

Regarding claim 1, Watanabe teaches a system for entity programming (col. 2, line 63 to col. 3, line 17), comprising: an entity player for invoking an entity, wherein the entity includes a plurality of methods (i.e., the dog represents a person, col. 6, lines 19-34); an entity editor connected to the entity player (i.e., for displaying the stars, col. 7, line 64 to col. 8, line 35); and at least one control device connected to the entity player, wherein the entity player invokes the entity methods in accordance with the control device (i.e., within the communication device to perform the function of displaying the character in animation, col. 8, lines 1-67).

Regarding claim 2, Watanabe teaches selecting an entity wherein the entity includes a plurality of commands that are associated with the entity, and selecting at least one entity command (col. 8, line 49 to col. 9, line 57).

Regarding claim 3, Watanabe teaches wherein the step of selecting the entity commands is performed through the use of an entity editor (col. 7, line 64 to col. 8, line 67).

Regarding claims 4 and 5, Watanabe teaches downloading an entity, wherein the entity is associated with a plurality of commands (i.e., receiving two characters, col. 9, lines 33-46); opening the entity in an entity editor to determine the plurality of commands associated with the entity (i.e., nodes in response to WAG TAIL, col. 9, lines 47-56); selecting at least one command (i.e., key operation instruction, col. 9, lines 46-56); and constructing a message from the selected command (col. 9, line 46 to col. 10, line 17).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ramachandran et al. (US 6,457,640 B2) teaches system and method for dispensing digital information from an automated transaction machine.

Teel, Jr. et al. (US 5,200,954) teaches communication link between multisite RF trunked network and an intelligent dispatcher console.

Kent (US 5,650,995) teaches console dispatch in an extended multisite radio communications network.
